

Usability Test
For Food Recipes Application
By Ghalewa M. Al-Badri

Welcome Message

Hello, and thank you for joining me today in my research to enhance the design of food recipes app. Please note that this test will be recorded for analysis purposes, and your privacy will be strictly maintained. Your feedback will help shape the future of the app, making it more user-friendly and intuitive.

Tasks

- Login
- Register
- Browse food category
- Choose one category
- Check details of the recipe
- Go to favorites list
- Go notes page
- Go to the settings menu
- Return to the home page

Participants Insight

Participant 1:

- Easy navigation between pages.
- I liked the application.

Participant 2:

- I liked the design.

Participant 3:

- I like to add voice guidance to the written steps.
- I liked the color of application.

Participant 4:

- Preferably add a name or logo for the app.
- It looks fantastic.

Participant 5:

- It's clear and easy to use.

Participant 6:

- Easy navigation between step by step.
- I love the app's colors.

Participant 7:

- Looks great.
- I like to add voice guidance to the written steps.

Participant 8:

- I liked the concept of video explainer.
- I loved the variety of options.

Participant 9:

- I like to add voice guidance to the written steps.

Participant 10:

- Preferably add a name or logo for the app.
- Easy transition between steps.

KPI

Increase Task success rate

Component to iterate on

The foods menu page

Hypothesis based on the data points that apply to the design:

- 60% of participant didn't to read the steps of recipes.

I created 1 alternate Solution based on the participant's opinions.

And I added some improvements.

Annotated the alternate solution with details of the improvements
